

TECHNICAL EXPERIENCE

Associate Software Engineer, — Logixal Cloud Solutions

Bengaluru, KA | June 2025 — Present

- Built and maintained production micro frontends on the VTEX IO platform, developing custom React components and integrating VTEX Master Data APIs to centralize customer and product records, improving data consistency across client accounts.
- Built real-time custom event listeners for platform-triggered events; participated in Agile sprint cycles, daily standups, and peer code reviews to ensure high-quality deliverables; wrote Jest unit tests covering critical React components and API integration points.
- Designed and developed RESTful APIs using Commerce tools, integrating product, cart, and customer data endpoints into React/Next.js frontends to deliver responsive, data-driven e-commerce experiences.
- Built scalable, reusable frontend components in React and Next.js, ensuring consistent UI patterns, accessibility standards, and cross-browser compatibility across client-facing storefronts.

Web Developer Intern — RK Technologies

Kurnool, AP | Feb 2025 — March 2025

- Delivered 5+ responsive React UI components for production features, ensuring consistent cross-device rendering across mobile, tablet, and desktop breakpoints.
- Applied accessibility and UX best practices (semantic HTML, ARIA labels, keyboard navigation) to improve usability across core user flows.

PROJECTS

RAG based Chat Application powered with LLM and Google Drive

- Built a **full-stack, multi-tiered RAG document Q&A system** (React frontend, FastAPI backend, PostgreSQL/pgvector) supporting document upload, multi-session chat with persistent history, and document-grounded answers via **semantic search over text embeddings**. Implemented application-level logging to trace requests across tiers and monitor embedding pipeline health.
- Implemented Google Drive OAuth via Nango across the full stack, enabling authentication, document import, scoped queries, and export of chat conversations in TXT, PDF, and DOCX formats.

Tech Stack: React, TypeScript, FastAPI, PostgreSQL, pgvector, Pydantic, SQLAlchemy, Gemini API, Text Embeddings, Nango, OAuth.

Worklog AI – Productivity Tracking Platform

[Live](#) | [GitHub](#)

- Developed a **productivity tracking platform** with **Node.js/Express** backend and **MongoDB/Mongoose**, featuring **RESTful APIs**, **JWT + bcrypt authentication**, Helmet security middleware, rate limiting, and **LLM-powered** weekly/monthly summaries via **OpenAI and Hugging Face APIs**.
- Configured **GitHub Actions CI/CD pipeline** to run automated integration and unit tests on every push and pull request, enforcing branch protection rules that block PR merges until all tests pass.
- Implemented Excel export using ExcelJS and built a React 19 + TypeScript + Tailwind CSS frontend with Radix UI, Framer Motion, and dynamic light/dark mode; followed Scrum-style iterative development with clearly scoped sprint deliverables.

Tech Stack: React, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, JWT, OpenAI SDK, Hugging Face API, Jest, GitHub Actions, ExcelJS.

ATS Resume Validator

[Live](#) | [GitHub](#)

- Built a **full-stack ATS audit tool that parses resumes and job descriptions** across a distributed 3-tier architecture (**React, Node/Express, Hugging Face Inference API**), scores keyword alignment, identifies skill gaps, and returns actionable optimization suggestions in under **3 seconds per analysis**.
- Wrote integration tests with Jest to validate scoring consistency across edge cases, and added request-level logging middleware to monitor backend performance.

Tech Stack: React.js, Node.js, Express.js, Hugging Face Inference API, REST APIs, JavaScript, Jest.

SKILLS

Languages	HTML, CSS, C, JavaScript (ES6+), TypeScript, Python, SQL.
Frontend	React.js, Tailwind CSS, ShadCN UI, Bootstrap, Zustand, Zod
Backend	Node.js, Express.js, FastAPI, NestJS, RESTful APIs, GraphQL, Pydantic
Databases	PostgreSQL, MySQL, MongoDB, pgvector (vector search) .
AI	RAG Architecture, Text Embeddings, Semantic Search, Gemini API, Hugging Face Inference API.
Testing	Jest, Automated Testing, Application Logging, Request Tracing, CI/CD.
Tools and Platforms	Git, GitHub, Postman, Vercel, Render, Railway, VTEX IO.

EDUCATION

B.Tech in Computer Science Engineering

Siddhartha Institute of Technology and Sciences, JNTUH

2018 – 2022

Hyderabad, TG

Coursework: Operating Systems, Object-Oriented Programming, Data Structures and Algorithms, DBMS, Web Development
